ONLY 2.2" TALL!**

Only \$99

Hurry - special limited-time pricing

Muvi LE is the world's smallest digital video recorder for law enforcement. Even though it's small, it still packs a punch. It can record for 90 minutes on the supplied 2 GB memory card. The memory card can be upgraded to provide more than 5 hours of recording time. The built-in rechargeable Lithium battery provides 3 hours of recording time between charges.

Muvi LE has a built in microphone and crisp wide-view lens, so it can record what you see and hear, even when you're away from your vehicle. This recorder can protect you from bogus complaints and keep you on the job.

The Muvi LE can begin recording by voice activation or by the press of a button. Its recordings can be viewed or downloaded on any computer by plugging the unit into a USB port with the supplied cable.
