

Introducing the *Muvi-LE Pro* Body-Worn Video Recorder With Date/Time Stamp

The *Muvi-LE* Series of video recorders for law enforcement are the smallest video recorders available and are ideal for evidence collection. Their portable, lightweight design can be integrated into any uniform. They can begin recording by voice activation or by the press of a button. With a built-in microphone and crisp wide-view lens, you can record what you see and hear, even when you are away from your vehicle. The recorder simply clips to your pocket or tie, or has other mounts and brackets available.

The law enforcement grade *Muvi-LE* Series is ideal for multiple surveillance tasks. *Muvi-LE Pro* has an on-board clock and records a date/time stamp on the video. It records on the supplied 4 GB memory card, which is expandable to 8 GB - providing more than 5 hour of recording time before downloading.

Recordings can be viewed or downloaded on any computer by plugging the unit into a USB port with the supplied cable. The battery charges from the same cable. Its built-in rechargeable Lithium battery provides 3 hours of recording time between charges.

To take advantage of this limited time offer, contact your MPH representative today.
