

True View™ DVD-based In-car Video System

MPH Introduces Easy Digital™

- ★ Preserve the original video for court, not a "copy" that could be questioned.
- ★ Play the video back on inexpensive consumer DVD players.
- ★ Convert video segments to e-mailable versions. Save selected segments on your desktop computer.
- ★ Save thousands in server and software costs over hard-drive and flash-based systems.
- ★ DVD disks are inexpensive and available at your local electronics or department store.
- ★ Little or no retraining required.
- ★ Use your existing SOPs.

True View is the best DVD-based in-car video system on the market. Its rugged design eliminates many of the maintenance problems associated with lighter-duty systems, while its DVD technology ensures that the disks can be viewed on any commercial player. Recording to DVDs allows the original evidence to be retained for court, with no concerns about alteration, and also allows the department to easily archive video evidence for decades without losing data integrity. Although no expensive servers are needed for data storage, all video can be converted easily to an e-mailable format. True View's variety of recorder and control head options allow the system to be installed into any patrol environment.

The company: MPH Industries, Inc. is the oldest manufacturer of in-car video systems, beginning with the Tech Systems DocuCam I in 1988. MPH also leads the law enforcement industry with its line of speed measuring equipment. MPH Industries is a subsidiary of MPD, Inc., a manufacturer of aerospace components and subsystems, electronic components, and breath alcohol systems. MPH Industries and MPD are 100% Employee-owned ESOP companies.

True View DVD-based In-car Video System

Summary Specifications

Description: True View is a complete mobile video evidence collection system. It includes a DVD-based video recorder housed in an enclosure (environmentally controlled vault or small in-cabin enclosure), a high quality color video camera, an overhead-mounted control console with color video monitor, a wireless microphone system, an in-car microphone, and all accessories necessary for installing the system in a vehicle. Several pieces of optional equipment are available, including a covert, infrared rear-seat camera. The system is supplied with a warranty of one year, parts and labor. Extended warranties are available.

Camera

- ❖ Standard low-light operation, with sensitivity less than 1 lux and 184x digital/optical zoom
- ❖ Optional NightView™ camera with optimum night performance and 40x digital/optical zoom
- ❖ 360 degree rotation to allow filming of back seat.
- ❖ Backlight camera controls on the rear of the camera for ease of operation. Camera controls also present on overhead console.
- ❖ One-touch TeleZoom automatically zooms in on the license plate and then returns to a wide angle view to record the full scene.
- ❖ Automatic or manual focus and adjustable shutter speed. Automatic backlight compensation and white balance. Manual zoom adjustment.
- ❖ Single cable interface to the rest of the system.
- ❖ Record and microphone indicators visible externally.
- ❖ Size: 4" L x 2¼" H x 2¼" W

DVD Recorder

- ❖ Ruggedized DVD recorder specifically designed for mobile applications.
- ❖ Standard MPEG-2 compression format, compatible with most commercial DVD players and computers.
- ❖ Complete overwrite protection.
- ❖ Can pre-record video prior to being triggered to catch the violations, and post-record after being deactivated, in case something unexpected happens at the scene.
- ❖ Can record up to 8 hours of full-motion video on a single DVD. DVD+RW disks can be reused over 100 times.

Choice of Recorder Enclosure

- ❖ Stainless steel enclosure with full environmental controls, for mounting the recorder in the trunk.
- ❖ Miniature locking enclosure for mounting practically anywhere in the vehicle's cabin

Digi-Talk™ 2.4 GHz Wireless Microphone

- ❖ Uses spread spectrum communication. Synchronizes to any other Digi-Talk system when placed in recharging cradle.
- ❖ Recorder begins recording automatically when microphone is turned on. True View can also automatically activate and turn off beltpack.
- ❖ Has internal microphone and antenna. Also supplied with Lavalier mike with tie clip and windscreen.
- ❖ Operating range of over 1000 ft.

Choice of Control Console and Monitor

- ❖ Overhead console incorporates of the system controls and the monitor in a single very small package that does not interfere with other equipment or the airbags. It includes a 3½" color LCD TFT monitor (active matrix) with brightness and volume adjustments.
- ❖ Separated control console incorporates all of the systems controls except the monitor, in a small package ideal for mounting in the center console or elsewhere in the vehicle. The separate monitor is a 5" color LCD TFT monitor with integrated speaker with brightness and volume adjustments.
- ❖ Both control consoles contain an alphanumeric status message window, separate from monitor display.

Optional Infrared Backseat Camera

- ❖ Small camera that mounts covertly to record in-car activity of rear-seat occupant.
- ❖ Self-contained, invisible infrared illumination provided to allow operation in any light condition, even complete darkness.

Other Optional Equipment

- ❖ Interface for non-MPH radars.
- ❖ GPS with coordinate display and speed trigger option
- ❖ Rear camera for back window
- ❖ Extended warranty.
- ❖ Kevlar lining and/or grill-mounted system monitor lights (for trunk-mounted vault only)
